

NTPC National Sustainability Summit & Exhibition on Rural Technology 2016 (N2S2)

**20 -22 October, 2016,
PMI, NTPC NOIDA**

Overview

Sustainability is a holistic term, covering everything from community development, energy efficiency and development of renewable technologies, to incorporation of green infrastructure and adaptation to climate change. The three pillars of sustainable development – economic growth, environmental stewardship, and social inclusion – carry across all sectors of development, from cities facing rapid urbanization to agriculture, infrastructure, energy development and use, water availability, and supply chain management. As emphasized by our Hon. Prime Minister an inclusive and sustainable development in the rural sector is equally important for the overall economic growth of the nation.

As a company NTPC is committed to being a responsible corporate citizen, our behavior reflects our values and concern for our shareholders, employees, their families, communities and the environments in which we live and operate. Sustainability is core to our business. Our strategy recognizes that we conduct business in an evolving global landscape and our ability to achieve sustainable outcomes is intertwined with people, the planet and the economy.

About the Summit

The NTPC National Sustainability Summit 2016 is being organized during October 20-22,, 2016, at NTPC PMI, Noida. This Summit is designed as a platform to engage businesses and other stakeholders on corporate sustainability and its mainstreaming in India, and to create a momentum towards adoption of sustainability practices particularly focused on Rural Sustainable Development. It aims to highlight the direction that corporations have taken and the way forward to reach these sustainability goals with a focus on the demands of a changing paradigm of business. This Summit will aim at redefining the momentum that sustainability related initiatives have gained in the corporate sector, in light of the multitude of financial, corporate governance and environmental regulations focused on sustainability, and responsibility disclosures that have been mandated by the Government in recent times.

The exhibition shall be a showcase activity covering various aspects of sustainable rural development as cleaner energy options, resource efficiency , sound waste management and sanitation etc.

Objectives

N2S2 will be a topical brainstorming platform with knowledge sharing, networking and capacity building to address key issues of sustainability for businesses including:

- Presenting national and international best practices of sustainability and case studies
- Networking and platform for sharing innovative sustainability ideas from diverse domain
- Providing a platform for stakeholders to engage with each other in the area of sustainability while building their capacities on sustainability issues
